

EUSW European Platform for
Worldwide Social Work

One of the primary aims of the network is to develop a robust knowledge base on social work, service users, policy, practice and education across Europe. The network will begin with more than ninety social work organisations represented and will seek to draw in many more as it progresses. These organisations will contribute knowledge from their geographical location and particular perspectives to underpin this ever expanding European data bank.

The members of the network seek both to learn from each other's experience and practice and also generate new responses to problems of social exclusion and hardship. However, the collective resource of pan-European knowledge of social problems and responses will also be available as a unique and invaluable resource to politicians, policy makers and other interested parties across Europe. This would serve to redress the current absence of such an accessible and comprehensive resource for European policy makers to access up-to-date and reliable information. No methodical collection of such material seems to exist currently. the network aims to fill this gap.

(a bstract from 223085 EUSW original application)
